My IVF Breast Cancer: Estrogen Metabolism, Cancer Treatment & Functional Genomics

Synopsis

This book is essential reading for anyone who is considering or has already had in-vitro fertility treatments or hormone replacement therapy. In March 2009, Babs Riley was diagnosed with aggressive breast cancer. This book shares her diary entries beginning with her fertility treatments, her quest to create babies, the breast cancer diagnosis, 3 surgeries, aborted chemotherapy, hospitalization, over-radiation and her recovery. Hers is an ongoing medical odyssey to learn about her genetic make up, find out why her fertility treatments triggered breast cancer and her continuing quest to make sure her cancer stays in remission forever. The website, www.ivfbreastcancer.com, contains extensive information about the study. Her blog at www.ivfbreastcancerblog.com continues her story.
