My son has language based learning disabilities...kind of dyslexia, but different. He needs a school that can support him and also challenge him. I like the way this book is organized and ranks by level

of support given. A lot of schools talk a good game, but apparently don't come through. I wondered if this would duplicate what you can find for free on line, but it definitely adds value. My son is in his junior year, but this is already well thumbed. I wish there was an On line searchable version where you could compare schools directly to each other.

Good resource, as a starting point. Especially if you are unaware of what types of programs colleges offer for children with learning differences. However, you still have to do your own research and ask questions of every college you are considering.

The detailed and reliable information in this Guide is an invaluable resource for those of us who work professionally with students and their families as they evaluate appropriate colleges/universities.

This book is perfect for finding a college that will fit my son's needs. Very comprehensive. I would recommend it to any parents with LD children.

excellent- very informative and inspirational.

Hugely helpful
