Customer Reviews

Any woman over 40 will find much useful information in this book. Ms. Austin looks at how attention to exercise, nutrition, health, beauty, and attitude can make women feel and look better while actually being healthier and more energetic. Her writing style is positive and friendly, and she

addresses many important issues about women's health that I have not seen as well addressed in other books. The exercises are well illustrated, and even I could use most of the recipes. The book has two weaknesses that you should watch out for. Some of the exercises (especially the yoga) could cause you to hurt your back. The proposed diet, while a healthy one, is not as well suited for all blood types as Live Right 4 Your Type would recommend. The diet here seems to be pretty close to the ideal one for those with Type B blood. Unlike some authors who write about health and aging, Ms. Austin consulted experts to give you the latest information. She also adds her own experiences as a working mother of two. The practical advice for how to get more done in less time will be very welcome for busy women. By having a balance of exercise, a better diet, living a healthier lifestyle, using beauty restoratives, and maintaining a positive attitude, you should live longer, look better, and enjoy a healthier life. If you ignore the exercises that could strain your back and follow Live Right 4 Your Type for a diet that matches your blood type, this is clearly a five star book. If you have cardiovascular disease, your diet will have to go the low-fat route more than either book recommends (see Dean Ornish's Reversing Heart Disease). Having seen how much more specific the book could be by focusing on women over 40, I came away impressed that more health books should take such a more segmented approach.
