Customer Reviews

My grandchild is 13 and in the 7th grade. Cursive writing was not part of the elementary school curriculum. It seems that some view it as not necessary. Yet, her signature was required on applications for magnet school. She tried, but the signature was awful. Since being in middle school, her signature has been required on several documents. I refuse to let her continue to wing it. She completed the workbook, and can now write in cursive,

My 10 year old son is enjoying using this book. Cursive has been removed from our school's curriculum, but his current teacher is sneaking it in anyway (thank goodness!). I bought this book and the companion book with just the letters. He doesn't really use the one with just letters much, as this book gives plenty of practice for each letter while also attaching it to other letters. The 'how to attach the letters to each other' was the part my son needed to practice. Other children might prefer to practice the solitary letters first, as we all learn differently. But if you're only wanting one book, I would recommend this one as it affords both.

It just doesn't get any better than these, I started with these and have ventured off only once to end

up coming right back to these the setup of the learning is awesome and easy enough for my kids to progress through the subject matter on their own!!

I am really impressed with all of the Kumon Workbooks we have ordered (we have quite a few). I really do like this cursive writing book. However, this one I would actually err on the side of using it with younger children. It is a great follow-on to the first cursive writing book and I would recommend it for the 4 - 6 crowd instead of 6 - 8. This workbook is great for people who are using Montessori methods of cursive first with younger children.

My son, who hates practicing his penmanship, actually asked to work on this book. He enjoyed the lessons and I think the goals were very attainable for one sitting. I like the Kumon books and have bought several others. Highly recommend.

Our child struggles with handwriting and is afflicted with chicken scratch inheritance from her father. Cursive is helping her write neater; she's doing 2-3 pages daily during summer before 2nd grade starts

My fifth grade son recently switched to a school where cursive is no longer taught. He had background in cursive from the old school and I wanted him to continue to practice. This is a book for younger kids - they start out writing words like cat, bat, etc. So if your child already has a background in cursive, this is much too simple.

My 7 year doesn't mind doing this book! He can do it on his own and his handwriting is definitely improving as he progresses through. Perfect next step after individual letters.
