What happens to you when you don't know or understand the social rules? Thousands of kids with Attention Deficit Disorder could tell you exactly what happens. People don't have conversations with you. Friends are something that other people have. School is a painful and difficult place. Bullies love to pick on you. Others don't realize that you have feelings. Your body language is off, so you are left out of social situations. Manners are a mystery. What can a kid with ADD do to get around these social obstacles? *Social Rules for Kids-The Top 100 Social Rules Kids Need to Succeed* by the author, Sue Diamond, gives the answers to that question clearly and concisely. This book came into being as a response to a student's needs. Ms. Diamond, a licensed speech pathologist, has taken the time to develop practical rules to help children communicate socially with others. This book is kid-friendly. The language is positive, simple, and directive. Its format is easy to follow. There is one rule on each page. The rule is in bold print at the top of the page. Then, there is a simple

justification for the rule. After that, there are concrete steps listed to implement the rule. At the end of the rule is a bold print "remember" statement. This restates why it is good for the child to apply the rule. Using this kid-friendly format, each chapter addresses different groups of social rules: Chapter 1-"Talking and Listening" discusses the proper way to greet people. Beginning a conversation and sustaining it has several rules devoted to it. Attention is paid to taking turns in conversation. One rule tells kids how to tailor their topics to their audience. Chapter 2- "Friends" tells a kid how to make a friend and to keep that friend.
